

1ST INTERNATIONAL STUDENT COMPETITION FOR MARITIME ENERGY EFFICIENCY

THE HYDROCONTEST PROJECT

Innovation at the heart of a more responsible maritime future and a major tool for decarbonization

From September 22 to 27, 2025, ENSM and its Foundation are organizing the HydroContest competition in Marseille.

16 teams will be **challenged to design, build and pilot** scaled-down vessels according to **precise specifications**, maximizing energy efficiency and minimizing environmental impact.

Are you a student **at a maritime, engineering, or naval architecture school?**

Would you like to challenge yourselves for a major environmental cause of decarbonizing ships? Then get involved with your team in the HydroContest project.

REGISTRATIONS

Signing up couldn't be easier!

Set up teams of at least 3 people (1 Team Manager, 1 Communications Manager and 1 Education Manager).

There is no limit to the number of team members.

Submit a pre-registration

before **1 October 2024** by e-mail to

hydrocontest@supmaritime.fr

HydroContest competition rules are available on request.

The race rules and the eco-design charter will be sent upon your pre-registration.

THE CONTEXT

In a world where the volume of goods transported by sea has quadrupled since the 1970s, players in the maritime sector will come to HYDROCONTEST to find out about the prospects for the energy transition. Come and join us as we build the future of maritime transport!

“ Don't miss this event and make an active contribution to a more eco-responsible maritime future! “

Simon BERNARD

Co-founder of Plastic Odyssey
and sponsor of HydroContest 2025
