THE CHALLENGES OF MARITIME TRANSPORT

Maritime transport represents a major environmental challenge. Although it emits less CO₂ per tonne transported than other modes of transport, it is responsible for 3,5% of global greenhouse gas (GHG) emissions due to its scale

Indeed, the volume of goods transported by sea has quadrupled since the 1970s, reaching 13 billion tonnes in 2023.

In this context, maritime industry stakeholders must prepare for the future by focusing on the energy transition, an urgent necessity for the industry.

HACKATHON PRESENTATION

What is the HydroContest By ENSM Hackathon?

HydroContest By ENSM is organizing this year an exceptional Hackathon dedicated to maritime innovation and the energy transition. This unique challenge will bring together students passionate about engineering, navigation, and innovation to come up with concrete solutions to the challenges of sustainable maritime mobility.

Why participate?

- **Enriching experience:** Put your skills in engineering, project management, and creativity into practice.
- **Interdisciplinary collaboration:** Work in teams with students from diverse backgrounds (engineering, design, aerospace, economics, naval, environment, etc.).
- **Visibility and opportunities:** Present your ideas to a panel of experts and expand your professional network.
- **Prizes and rewards:** Prizes will be awarded to the top 3 teams to recognize their innovations.

"This hackathon is a new opportunity for maritime transport, which has already begun its transformation. Decarbonization is not an option, it is a necessity, and it is being thought about from the schools today. Come in large numbers to be the actors of the energy transition through Hydrocontest, a laboratory for building the maritime transport of tomorrow."

François Lambert
ENSM General Director

Who can participate?

This event is open to higher education institutions and universities, wishing to register one or more teams under their banner. Each team will consist of 1 to 10 students, either from the same institution or through inter-school collaboration.

Hackathon Process:

- **Announcement of the study topic:** The organizing team will reveal the challenge to be tackled on April 18, 2025
- **Reflection and design phase :** Teams will have just over 2 months to analyze the topic, propose innovative solutions, and develop a detailed project in digital format.
- **A pre-selection** of the 30 best submissions will be submitted to the jury.
- **Pitch in front of the jury:** The 10 finalist teams, selected by the jury, will present their project in front of a panel of professionals from the maritime sector.
- **Award ceremony:** The top 3 teams will be rewarded.

Important dates:

- **April 18th, 2025:** Sending of the dataset to registered teams for the competition;
- **July 1st, 2025:** Deadline for submitting project files;
- **July 18th, 2025:** Deadline for revising project files for teams whose submissions are not compliant;
- **July 18th to August 30th, 2025:** Analysis and pre-selection of project files by the jury;
- **September 1st to 5th, 2025:** Jury deliberation for the finalist and Results published on our website
- **September 26th, 2025:** Award ceremony.

"What vessels for sustainable maritime transport that respects climate goals?"

The HydroContest By ENSM Hackathon is an international competition that allows students to engage in teams within this new paradigm.

It is a fantastic opportunity to imagine and implement solutions that address the challenges posed by the energy transition."

Olivier DANIEL

Teacher FON - Initiator of the Hackathon project for HydroContest By ENSM

HOW TO REGISTER A TEAM

Participation requirements

The Hackathon by ENSM is an international competition open to students aged 18 to 30 years on the day of the project submission deadline, who are enrolled in full-time studies for the 2024-2025 academic year at any scientific university, engineering school, or maritime training institution.

Participation in the competition can be undertaken by students independently of their studies or as part of their academic curriculum.

Students can register alone or form a team, but always under the responsibility of an academic supervisor who legally and administratively represents their institution. The academic supervisor, whether a teacher or other staff member, must be part of the institution's personnel. Their role is to guide and support the students throughout the project.

Multiple teams can participate from the same institution. It is also possible to form a team with students from different institutions.

Registration process:

Registration for the Hackathon by ENSM is free of charge.

There is no longer a fixed registration deadline. However, please note that the hackathon topic and the related dataset will only be shared starting April 18, and only after all registration documents have been received in full.

The registration forms must be submitted electronically to the following address:

hackathonhydrocontest@supmaritime.fr

Teams will be notified of their final registration by the organizer after the submitted documents have been verified. The Organizer reserves the right to refuse the registration of a team if their submission is deemed incomplete.
